

Notice of Security Incident

Lincare Holdings Inc. and its subsidiary companies (collectively, “Lincare”) value and respect the privacy and security of patient personal information, which is why it is notifying patients of a recent security incident that may have involved the disclosure of certain personal information. This notice describes the measures Lincare has taken since the incident and steps impacted individuals can take to further protect their personal information, as they feel it is appropriate to do so. *Lincare is attempting to notify by letter those potentially impacted patients for whom it has mailing addresses.*

What Happened? On September 26, 2021, Lincare identified unusual activity on certain systems within its network. Lincare took immediate action after learning of the incident to secure its network and launched an investigation, including working with outside cybersecurity experts to determine the source of the activity and potential impact on Lincare’s network. The investigation confirmed that certain systems may have first been accessed on September 10, 2021. The unauthorized access was blocked by September 29, 2021. A comprehensive review of all potentially impacted data has commenced and remains ongoing. This review includes a manual review of the data to identify any potential personal information. We are not aware of any misuse of personal information as a result of this incident.

What Information Was Involved? The investigation has determined that the incident may have resulted in unauthorized access to some patient personal information. The information at issue varies by patient and may include first and last names, addresses, Lincare account numbers, date of birth, and health information such as health insurance member numbers, healthcare provider names, treatment and prescription information, and medical procedure information. In very limited circumstances patient Social Security Numbers may have been impacted.

What We Are Doing. Lincare takes the protection and proper use of personal information very seriously. We are attempting to notify by letter those potentially impacted patients for whom we have mailing addresses. Where appropriate, we are offering patients complimentary credit monitoring and identity theft protection at no cost to the individual. We took steps to launch an investigation immediately after identifying the incident, enlisted cybersecurity experts to assist in the investigation and notified law enforcement of the incident. We also promptly reset all user passwords to block any unauthorized access and are implementing additional technological safeguards on our systems that contain personal information to minimize the possibility of an incident like this from occurring in the future.

What You Can Do. We are aware of how important personal information is to patients and their loved ones. Although Lincare is not aware of any misuse of patient information as a result of this incident, as a best practice, we encourage all patients to remain vigilant against incidents of identity theft and fraud, to review all claims information from a health insurance provider and to monitor credit reports and financial statements for suspicious activity.

For more information or if you have any questions regarding this incident, please call our dedicated assistance line at 855-912-1262, Monday through Friday, 9:00 am to 6:30 pm Eastern Time (excluding major US holidays). We sincerely regret any inconvenience that this incident may have caused.
